# AMLO: popularity vs. reality

## SUMMARY

- Global. Global slowdown expected, with possible trade disputes. Frontier wall dispute • could cause Fitch downgrade for US.
- Mexico. After first 100 days, AMLO popularity tops 83%, reflecting his clear separation • of politics from economics.
- Global risks 2019: sudden slowdown, trade wars, geopolitics, Brexit/Europe, monetary policy, emerging markets.
- Local risks: dysfunctional government, non-ratification USMCA in US, credit downgrade.
- Investment scenarios 2019 with probabilities: positive (20%), negative (40%), middle (40%)
- For peso portfolios, overweight liquidity and ILS 1 to 3 year duration, underweight stocks and REITs.

"It would be nice if we could all agree to this proposition: popularity is not the same as achievement" - Howard Jacobson

## **Risk assets recover YTD**

After its worst December since 1929, the S&P500 had a big recovery, as did foreign stocks and Mexican REITs, although Mexican stocks performed worse. Nominal bonds in Mexico have outperformed ILS as lower inflation is expected for 2019 than 2018.

### POLITICS USA

### Partial government shutdown and state of emergency

On February 15, the US Congress approved a law to prevent a second partial shutdown. US\$1.38 bn. for the construction of the frontier wall were included, below the US\$8 bn. Trump requested. Trump therefore declared a state of national emergency to use funds earmarked for other uses (Figure 2).

Rubro original	Monto (US\$ mil mn.)
Aprobados por Congreso	1.4
Construcción Militar	3.5
Lucha contra drogas	2.5
Programa de confiscación de drogas	0.6
Total	8.0

Figure 2. Source of funds for frontier wall construction. Source: Bloomberg

Most Democrats and some Republicans rejected the measure and headed off the state of emergency, undermining the negotiation to the national debt ceiling which expired March 1. No agreement has been reached, forcing the government to fund itself by other means, which will run out at the end of July. If that occurs, the US could enter into a state of default.

Fitch the rating agency stated that without an agreement on the debt ceiling it would have to review whether the US' ability to approve a budget deserved a AAA rating. If no agreement is reached, a Fitch downgrade is probable, as occurred with S&P in 2011, to AA+, its current level. This means that it would be rated AA+ by 2 agencies, leaving out only Moody's.

## Trade war

Negotiations between the US and China continued during February. A group of important US businessmen came out in favor of tariffs imposed on Chinese products. China said that 2019 would have lower growth, partly due to a decline in domestic consumption and partly to the trade war. Its growth target was reduced to a range of 6%-6.5%.

## EUROPE

### Brexit

Negotiations in the UK parliament are still stalled in the runup to the due date (March 29) for the application of Article 50, the treaty clause that triggers the Brexit process. After various failed attempts, Prime Minister May submitted her latest deal with the EU, with some changes to placate opponents from Labor and within her own Conservative party, and to meet the due date to avoid a no deal Brexit. She lost the vote, increasing the possibility of an extension of the date, or, less probably a "no deal Brexit". If the date is extended, the probability of a second referendum increases.

## MEXICO

### National Guard

In February, the creation of a National Guard was unanimously approved in Congress, and in early March it was approved by 17 local Congresses, enough to enable its execution by the President. AMLO was not entirely satisfied with the law approved by Congress because it decided that the Guard should come under civilian, not military, control, as he had proposed. From March 6, Congress has 60 days to finalize the Law, and 90 days to approve the enabling legislation.

## AMLO popularity

Various polls have measured AMLO's popularity, the most recent being by Gabinete, a polling firm (Figure 3). Figure 3. AMLO popularity. Source: Gabinete (8Mar19)

The ranking of the reasons for his popularity show clearly the importance given to wealth redistribution over wealth creation (Figure 4). The only items with a rating below 50% are the cutting of funds assigned to daycare centers and female victims of violence.

## Social programs targeted at increasing votes in 2021

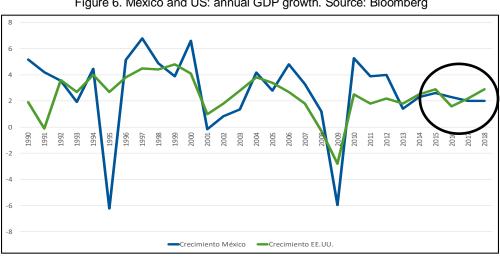

Social programs implemented by the AMLO government are aimed primarily at population segments able to vote. Approximately 26% of the electoral register (an estimated 23 mn. voters) will be beneficiaries of a social program for 2021. This is reflected in the increase in party identification with Morena above the other 3 parties (Figure 5), which could be very important for the mid-term elections in 2021.

### ECONOMICS GLOBAL

# Growth

In 2018, the US economy grew 2.9%, an increase over 2017 (2.2%). One ot the main drivers is still consumption. However, decoupling has begun for the Mexican economy. From 1994, the year of NAFTA implementation, the two economies had been closely correlated, but since Trump was elected uncoupling can be observed. (Figure 6).

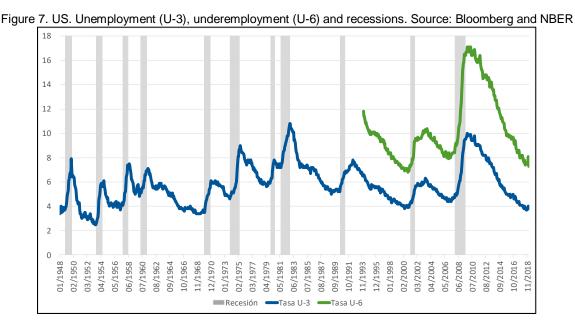

## Figure 6. Mexico and US: annual GDP growth. Source: Bloomberg

### Employment

In the US, 20,000 jobs were created in February, below the consensus estimate (180,000). However the uemployment rate (U-3) fell from 4% to 3.8%. The underemployment rate (U-6) also fell from 8.1% in January to 7.3% in February (Figure 7). Although the job creation number might appear to imply a slowdown in February, the unemployment rate remains close to its record low (3.7% in November).

# MEXICO

## Growth

According to data published at the end of February, the Mexican economy grew 2% in 2018, the same as 2017. However, the advance indicator of INEGI (IGAE – the government statistics department) shows an important slowdown at the end of 2018 and the beginning of 2019, due to the change of government, gasoline shortage in January, blockages in Michoacán state and strikes on the Northern frontier. All this probably implies a weak 1Q 19 (Figure 8). For the full year 2019, at end February, Bank of Mexico lowered its economic growth forecast from a range of 1.7-2.7% (published October 2018) to 1.1-2.1%.

Since the beginning of the AMLO administration, there have been 45 strikes, significantly higher than the number of strikes during the six years of the previous (Peña Nieto) administration (Figure 9).

### Figure 9. Strikes: total strikes and industrial strikes, per year. Source: INEGI

## S&P: deterioration of outlook for credit rating

On March 4, S&P lowered Mexico's credit outlook from neutral to negative, keeping the rating at BBB+ global. This implies a minimum 33% probability of a ratings downgrade in the next 12 months. The main reason was the change of government policy to diminish the private sector's role in the energy sector, which could increase Mexico's contingent liabilities and reduce economic growth. Current ratings and outlook for the main three agencies are listed below (Figure 10). Also, in early March, an initiative was introduced to Congress by a member of Morena to remove the license of ratings agencies considered negative to the Mexican economy. This was rejected by the leader of the Morena delegation, Ricardo Monreal, and by AMLO in one of his early morning press conferences.

	Calificación global	Perspectiva	Último cambio
Fitch	BBB+	Negativa	31-Oct-18
S&P	BBB+	Negativa	1-Mar-19
Moody's	A3 (A- en escala homologada)	Estable	11-Apr-18

Figure 2	10. Mexico	ratings;	main rating	gs agenc	ies. Source	e: rating ageno	cies

The government has said it will announce new support measures for Pemex. In March, news came from the Financial Times of an announcement in London by Treasury Undersecretary Arturo Herrera, that construction on the new Tabasco refinery would be postponed to 2020, in order to strengthen Pemex finances, but this was immediately denied by AMLO in another press conference.

## Inflation

February consumer inflation was -0.03% less than January, cutting annual inflation from 4.37% at end-January to 3.94% at end-February. The main cause were fruit and vegetable prices that fell by up to 30% during the month, offsetting the prices rises of low octane gasoline.

Even overall inflation is expected to fall in 2019, we expect an upturn in the next few months due to: 1) the increase in low octane gasoline in February and March with a weighting of 5.36% en the INPC price index; and 2) the change in the INPC calculation methodology in August 2018, and the fact that the normal "deflation months" will not be as strong as before, implying that 12 month inflation increase March-April. Electricity weighting fell from 2.81% to 1.49%.

### MARKETS

### Investments in US\$ and pesos: comparative performance

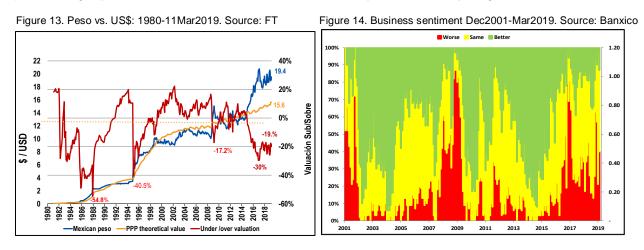

Following peso depreciation since Trump, long term (2000-2019) the gap in returns on investment in peso denominated investments and US\$ denominated investments, converted to pesos, has diminished. However, peso denominated have still outperformed US\$ denominated investments, risk adjusted (Figure 12).

## US\$ and peso

Practically 100 days into the AMLO administration, the peso has appreciated owing to general US\$ weakness, the interest rate differential, and foreign investor appetite for Mexican risk (Figure 13). Sentiment measured by Bank of Mexico improved slightly in December but deteriorated in January and February (Figure 14).

## Debt

Rates are expected to rise in DM and all EM, except Brazil and China (Figure 15).

### **Stocks**

During 2019 YTD, stock performance measured in US\$, in sharp contrast to 2018, has been globally positive owing to pro-market statements by the Fed, and expected resolution of trade disputes (Figure 16).

## **REITs (Fibras)**

Since inception, Fibras have outperformed stocks (Figures 17). In 2019 strong performance is due to higher dependence on global trade than most IRT stocks (Figure 18).

## Conclusion

The global outlook has improved for risk assets, with a milder slowdown and less aggressive monetary policy. Perception of local risk has increased with redistributive social spending policies and deterioration in investment becoming clearer, reflecting the government's emphasis on "politics" over "economics". We advise caution for peso denominated portfolios, overweight liquidity and ILS 1 to 3 year duration, underweight stocks and fibras.

## Investment indicators to February 28, 2019

In February in Mexico, the IPC stock index fell 2.65%. Nominal rates fell except for 28 day Cetes. 10 year real rates fell and 30 year rates rose. The US\$ rose by 1.17% against the peso. In the US: DJ, S&P500 and Nasdaq rose. All nominal rates rose. WTI oil rose 5.86%. In the Bank of Mexico business climate survey, optimism rose to 22% (17% previous), no change fell to 31% (37%), and pessimism was unchanged at 47%.

### **IMPORTANT LEGAL INFORMATION**

The material has been prepared by Franklin Templeton Servicios de Asesoría Mexico, S. de R.L. de C.V. ("FTSAM" or the "Company") which has the folio inscription number 30045-001-(14127)-15/04/2016 in the Public Register of Investment Advisors assigned by the National Banking and Securities Commission (Comisión Nacional Bancaria y de Valores) in terms of the Securities Market Law (Ley del Mercado de Valores). Registry does not imply compliance with the regulations applicable to the services that are provided, nor the precision or veracity of the information provided. The content of this document is for information purposes only. Past Performance is not a guarantee of future returns.

The material has been prepared by FTSAM solely for use in this document, and is intended to be of general interest only and does not constitute legal or tax advice nor is it an offer for shares or invitation to apply for shares of any kind. Nothing in this document should be construed as investment advice. This document may contain information obtained from various sources, and while it may be considered reliable, the Company makes no warranty or any statement on its fidelity, accuracy, scope or coverage, as the Company has not verified, validated or audited independently such information. The information is partial and, therefore, cannot be called complete. You agree to keep the contents of this document strictly private and confidential and it shall not be disclosed, copied, reproduced or redistributed (in whole or in part) to any person without the prior written consent of the Company.

This document may contain "forward looking statements" and results may vary from those expressed or implied are included in this document. Such forward-looking statements can be identified, among other words, by the use of terminology such as "expect", "anticipate", "believe", "continue", "could", "estimate", "predict", "try" "plan", "predict", "should" or other forward-looking terminology, or by the negative of these words or comparable terminology, including without limitation the plural form of these words. All forward-looking statements relate to the Company's current expectation regarding future events and are subject to a number of factors that could cause actual results to differ materially from those in respect of the forward-looking statements. One must be cautious of such statements and should not place undue reliance on any forward-looking statements.

This document includes no representation or warranty (express or implied) so it should not support the accuracy, fairness or completeness of the information presented or contained in this document. Neither the Company nor any of its affiliates, employees, advisers or representatives accepts any liability for any loss or damage caused by the information presented or contained in this document.

The information presented or contained in this document is current as of the date indicated and is subject to change without notice and its accuracy is not guaranteed. The information contained herein and the views, if any, expressed therein are issued on the date hereof and, therefore, are conditioned and / or subject to probable changes due to changes in applicable law, as well as the conditions and circumstances that may or may not be provided in this document, in addition to over time and other similar situations. Neither the Company, nor its affiliates, agents, employees nor advisers assume any responsibility or obligation to inform you or any other person regarding any changes to the information or opinions expressed herein resulting from matters, circumstances or events that may arise in the future or that may be brought to our attention after the date herein. This document should not be construed as legal, tax, investment or any other type of advice.

This document does not constitute an offer or invitation to purchase or subscribe shares or other securities and no part of this document or any information, opinion or statement contained herein shall be the basis of, or be referred to in connection with any contract or commitment. Any decision to purchase securities in any offering of securities should be made solely on the basis of information contained in the prospectus of the securities offered. By reading this document, you agree to be subject to the above limitations.

\*Timothy Heyman, President of FTSAM, founded Heyman y Asociados in 1985. In 2013, Franklin Templeton established FTSAM and merged it with Heyman y Asociados.
