The 4th Annual Cornell Investment Portfolio Case Competition
Organized by Cornell’s Parker Center for Investment Research, Johnson Investment Management Club and Cornell Financial Engineering Manhattan (CFEM)

Friday, January 31, 2020, Cornell Tech Campus, Roosevelt Island, NYC

The Cornell Investment Portfolio Case Competition is an intercollegiate portfolio design competition, offered to create awareness of portfolio management careers and facilitate students’ networking and recruiting opportunities in the field with sponsoring firms. The competition is designed to promote analysis and investment strategy development in private wealth, retirement and endowment/foundation asset management and portfolio construction and risk management.

Each school will send a team of 3-4 1st-year graduate students to present their investment case analysis and portfolio recommendations to attending judges and recruiters from sponsoring firms. Students will have one week to research the case, will make a 10-minute presentation and respond to 10 minutes of questions, and are required to provide a 2-page summary to judges.

Time will be set aside for career coffee chats and resume books of participating students will be distributed to sponsoring firms.

Why Students Should Participate: Compete in a unique investment challenge that is different than popular stock picking and pitching competitions. Experience the intensity, depth, and breadth of questions posed by top investment professionals - the kinds of questions asked daily in the investment business. Network with investment industry professionals - IPCC judges, sponsors, and competitors who will soon enter the investments field. Practice creative analyses and prepare concise, compelling presentations.

Who Should Participate: 1st-year MBA and finance master’s students interested in pursuing careers in investment management and are preferably still looking for internship or permanent employment opportunities. This competition is ideal for students interested in portfolio construction and management.

Recommended Selection Process: We encourage schools to distribute information about this event broadly on campus, particularly to the investment clubs, and hold internal competitions to determine their teams. Two teams from one university may apply, and may be selected to attend as long as members of the teams attend different programs and there is sufficient space.

2020 Case: Case Topic: Target-Date Funds 3.0
First Prize $5000, Second Prize $1000

DATES
December 3: Informational Video, available at 4:00 PM EST
